Colombo 8.

Dear All,

District General Hospital Gampaha is the largest hospital in the Gampaha district, catering a population of 2.5million.

As you are already aware, District General Hospital of Gampaha is currently managing a rapidly expanding number of Covid patients with an increasing Oxygen demand. We are already functioning two Covid patient wards, a HDU and in the process of expanding our services by setting up a dedicated Intensive care unit and a HDU in our hospital for Covid patients.

Currently we have limited resources in our hospital to cater these patients.

Certain medical items urgently needed for that.

I have given the Priority list which are urgently needed.

- 1 Non Invasive Ventilator (NIV) – 02 units

Thank You.

Director

DGH Gampaha

**Donation Request - Base Hospital Wathupitiwala**

Dear all,

Base hospital wathupitiwala caters about 1 million population living around Gampaha district. Amidst the covid 19 pandemic we have been able to deliver the services with minimal disturbances to the clients.

Triage facilities and isolation facilities have been established to prevent cross infection of Covid 19 among the staff members and patients. Now 20beded HDU unit is under construction to improve the quality of care of Covid 19 patients who need artificial ventilation.

The following list of **Bio Medical Equipments** have been identified to meet the current demand. Kindly look in to the matter and support us to overcome the difficulties in this national disaster.
